Trust, Security, and Support

Trust and Security are our first priorities

Everything we do at HelloSign is done with security top of mind. HelloSign is a SkyHigh CloudTrust provider with the highest available rating of, "Enterprise-ready". We are compliant with all major eSignature laws including ESIGN, UETA, and European eIDAS. Our SSL encryption, world-class server infrastructure, and audit trails ensure that your documents are kept safe and secure. Finally, documents are encrypted using AES 256-bit encryption and customers may add another layer of security with multi-factor authentication.

Compliant and Secure

- Compliant with ISO 27001, SOC 2 Type II, HIPAA, GDPR, eIDAS and more

- All eSignatures are legally binding (documents post-signing are non-editable)

- All documents are encrypted at rest using AES 256-bit encryption

- For any document in transit to be signed, all communications are encrypted using SSL/TLS

- All backups are encrypted

- All passwords are hashed and salted

- Penetration testing is done by an independent third party

- Hosting in a state-of-the-art SSAE 16 audited facility that is also ISO 27001

- Audit Trails

- Role-based security

- Private Bug Bounty program with HackerOne (same as US Pentagon)

- HSTS is enabled (HTTP Strict Transport Security)

Concierge Level Support

We understand that every deployment is unique and support is an important part of success. With one of the most complete support offerings on the market, from our no-code options to our API solutions, our teams ensure customers can always get the help they need.
